Note that some of the authors listed below are quite prolific; therefore only their most recent or popular titles have been included. However, in most cases, the recommendation of an author is an indication that additional works by the same author would also be recommended. On the other hand, since our knowledge of the field is quickly evolving, choosing an author’s newest publications will provide the most updated material. This list is also limited to those texts and products with which the authors are familiar. Additional reading material is also listed at the end of each chapter in the text.

**Canine and feline behavioral references for veterinarians and behavior consultants**

Journal of Veterinary Behavior; Clinical Applications and Research.

Yin S. Low stress handling, restraint and behavior modification of dogs and cats. Available online at: www.lowstresshandling.com; 2009.
